Recessed for underwater applications

30/04/2024 Rev. 31

DESCRIPTION

recessed for underwater applications (suitable for use in seawater, only suitable for underwater applications); Awards: German Design Award 2019; recessed (wall), max depth 10 m; Power consumption: 20W; Power supply: 24Vdc; Lumen output at source: 782 lm; Delivered lumen output: 552 lm (34°); 3 cyan power LED groups, 50 000h L90 B10 (Ta 25°C); LED colour: shades of cyan; Optics: 22°: optical system consisting of a high-efficiency, deep-set TIR lens combined with a high-quality technical filter; Body material: body made of heat-dissipating technopolymer with a thermal conductivity equal to that of stainless steel; Screen material: glass cover in 12-mm-thick, tempered extra-clear glass with vitrified serigraphy suitable for installations in seawater and guaranteeing resistance to corrosion and to knocks and scratches. Mixing chamber to ensure the light's chromatic uniformity.; power supply unit not included; includes 5 m FEP+RUB cable (equivalent to H05RN-F cable), 6x0,50 Ø6.3 mm; Ingress protection: IP65, IP68; Impact resistance: IK10; not suitable for use in swimming pools with liners; Casambi control using the Casambi app with dedicated electronics; Protection systems: IPS (Intelligent Protection System) protects lighting fixtures from water infiltrations, which can occur if there are faulty junctions between the cables in outdoor or underwater applications. This innovation, patented by L&L, also guarantees electrical protection against polarity reversal, hot plugging, ESD and power surges, which can occur if there are faults in the electrical circuit; This is an NTC thermistor mounted on the LED board to protect the lighting fixture against overheating. Should the product function at an operating temperature greater than the maximum temperature at which it can operate correctly, the protection is activated and gradually reduces the power. The NTC causes the integrated electronic parts to cool down to avoid the lighting fixture instantly switching itself off. When the operating temperature is again within normal range, the NTC automatically restores the lighting fixture's original operating conditions; Operating temperature: 0°C — +45°C (installation underwater); Glow wire test: 960°; Photobiological safety: photobiological safety: risk group 1 according to EN 62471:2006; Appliance class: class III; Weight: 2200 g; Dimensions: Ø232x134 mm; Cutout dimensions: Ø260 mm; Energy efficiency class: F (light source) in accordance with EU 2019/2015; Accessories: WC5202 Outer casing, WH0402 Honeycomb louvre ; tested and approved via E.O.L. (End Of Line) test with functioning test and check of electrical power consumption
